one child every child

HISTORIC INVESTMENT IN CHILD HEALTH

Today, we are thrilled to celebrate that the Canada First Research Excellence Fund is investing \$125 million in the One Child Every Child initiative. Announced this morning in Montreal, this is the largest grant ever awarded to an Alberta university.

“We are overjoyed at this monumental support for research for children, youth, and families,” says Dr. Susa Benseler. “We are deeply proud of our teams and our partners – all share a heartfelt commitment to transform outcomes.”

Parallel paths shape, inform and guide all aspects of One Child Every Child, setting it apart from any research initiative ever attempted.

“This journey began with *ii' taa'poh'to'p*, our UCalgary Indigenous Strategy,” says Dr. Michael Hart. “The promise of One Child Every Child is to really listen to Indigenous voices and ensure Indigenous priorities and solutions are being heard and acted upon.”

One Child Every Child will dramatically improve the lives of children across Canada and beyond.

Our EDI action plan will embrace children at intersections and invest in community-led research projects to create a child and youth health hub focused on equity-deserving children.
