NSERC CREATE
Research Services has launched the 2019 NSERC: Collaborative Research and Training Experience (CREATE) internal competition process.

The NSERC CREATE program supports the training of highly qualified students and postdoctoral fellows from Canada and abroad through the development of innovative training programs, focused on student mobility (nationally or internationally), interdisciplinary research (NSE/health/social sciences), and collaboration between industry and academia. The NSERC CREATE is intended to facilitate the transition of new researchers from trainees to productive employees in the Canadian workforce.

Value: up to $1.65M in student salary and training support
Duration: 6 years

The NSERC CREATE is a quota program and all CSM-led proposals are recommended to contact Ryan Gabel rgabel@ucalgary.ca regarding the faculty process. Due to the competitive nature of this competition, additional Faculty support is anticipated.

Faculty members who would like to participate in the 2019 CREATE program must submit a four page internal Notice of Intent to medgrant@ucalgary.ca by January 2, 2019.

Interested groups are also highly encouraged to participate in a Test Your Concept session regardless of the state of application development. To signup, email ipd@ucalgary.ca by October 15th with as little as a project title.

Additional information can be found on the research services website: https://www.ucalgary.ca/research/node/5548 or by contacting rgabel@ucalgary.ca
